Professional Summary

Automation Test Engineer (SDET) with **3+ years** of experience building scalable end-to-end test automation frameworks for **Salesforce-based** and **automotive web applications** in **Agile/Scrum** environments. Skilled in **Playwright (JavaScript/TypeScript)**, **Robot Framework**, and **Selenium WebDriver (Python) with Pytest**, covering **UI**, **API**, **functional**, **regression**, and **BDD-based testing**. Automated **80%+ of regression test suites**, reducing manual effort by **60%** and raising **regression coverage from 70% to 90%**, which improved release confidence. Exploring the **Model Context Protocol (MCP)** and **AI agents (Planner, Generator, and Healer)** within the Playwright ecosystem to automate test planning, generation, and self-healing, and integrating automation into **CI/CD pipelines** using **GitHub Actions**. Strong communicator, adaptable, and self-motivated.

Technical Skills

Languages: Python, JavaScript, TypeScript
Automation Tools: Playwright, Robot Framework, Selenium WebDriver, Pytest
AI & Agentic Testing: Model Context Protocol (MCP), Playwright AI Agents (Planner, Generator, Healer)
Frameworks/Patterns: Hybrid, Data-Driven, Keyword-Driven, BDD, Page Object Model (POM)
Testing: Functional, Regression, UI, API, Cross-Browser, End-to-End, Manual
API Testing: Postman, Playwright API Testing, REST
CI/CD & Version Control: Git, GitHub, GitHub Actions, CI/CD Pipelines
Test Management & Reporting: JIRA, Xray, Allure, Robot Framework Logs, Playwright HTML Reports
Other: WebDriverWait, XPath, Locators, Agile/Scrum, PyCharm, VS Code, Windows, Linux (basic terminal)
Domains: Salesforce, Automotive Web Applications

Work Experience

Capgemini Bengaluru, India
Automation Test Engineer (SDET) **January 2025 – Present**
Domain: Automotive | Platform: Salesforce and Web Applications | Project: BMW Order Booking Mangement
Technologies: Playwright, JavaScript, Gherkin/BDD, MCP, AI Agents, GitHub Actions, Allure

- Architected and led a **Playwright (JavaScript) end-to-end automation suite** using the Page Object Model (POM), covering UI and API layers across multiple modules and reducing **manual regression effort by 50%**.
- Engineered cross-browser coverage across **Chromium, Firefox, and WebKit**, achieving **95%+ pass rates** on nightly regression runs and improving release confidence.
- Introduced **BDD practices** with Gherkin scenarios, converting **25+ business requirements** into **12 feature files and 40+ scenarios**, reducing requirement-clarification cycles by **25%** and improving collaboration between QA, developers, and business stakeholders.
- Applied the **Model Context Protocol (MCP)** and **AI Agents (Planner, Generator, and Healer)** to streamline test planning, authoring, and self-healing maintenance, reducing **test authoring time by 30%**.
- Built a **Playwright API testing layer** using APIRequestContext to validate REST endpoints for status codes, response integrity, and schema compliance, reducing the **API defect escape rate by 35%**.
- Integrated the suite into a **CI/CD pipeline (GitHub Actions)** with execution on every pull request and scheduled nightly runs, cutting **feedback time by 40%**.
- Implemented **Playwright HTML and Allure reporting** with failure screenshots and trace files, reducing **average debugging time by 30%**.

Capgemini Bengaluru, India
QA Automation Engineer December 2022 – December 2024
Domain: Automotive | Project: BMW CIM CRM (Customer Interaction Management)
Technologies: Robot Framework, Python, Selenium WebDriver, Pytest, Git, GitHub Actions, JIRA, Xray

- Automated approximately **80% of regression test cases** for Salesforce web applications using **Robot Framework** and **Selenium WebDriver**, achieving a **60% reduction in manual testing effort** and enabling faster, more reliable releases.

- Designed and maintained **60+ Python-based automation scripts** and **35+ reusable keywords and libraries** covering **10 key Salesforce UI workflows**, reducing **new script development time by 30%** and **maintenance effort by 25%**.
- Increased **test coverage from 70% to 90% within two Agile sprints**, reducing defect leakage into production and improving product stability.
- Collaborated with developers and product owners across **12 Agile sprints**, logging and tracking **150+ defects** in JIRA and Xray, with **90%** resolved within the sprint.
- Configured **GitHub Actions workflows** that ran **200+ automated UI tests** on every commit and pull request, catching defects before QA sign-off and cutting **feedback time from 4 hours to 45 minutes**.

Education

B.Tech, Computer Science and Engineering
Presidency University, Bengaluru, India **2018–2022**
CGPA: 6.39

Certificates

- **ISTQB Certified Tester – Foundation Level**, July 2023
- **ISTQB Test Automation Engineer – Advanced Level**, May 2024

Awards

- **RockStar Award** — Received three times (2023–Present) for exceptional performance and automation contributions.
